## NOTICE TO GRADING PERMIT APPLICANTS New Dust Control Ordinance Requirements

On November 13, 2003, the City Council of the City of Indio unanimously passed Ordinance 1357 which revised Sections 95.131A through 95.135A of the Indio Municipal Code, more commonly known as the Dust Control Ordinance. This ordinance was enacted April 1, 2004, to comply with requirements from the South Coast Air Quality Management District (AQMD), and has created new requirements for all applicants for grading permits.

1. All projects disturbing more than 5,000 sq. ft. of earth must complete a PM10 plan. Providing PM10 notes on the grading plan will no longer be adequate. Consult the AQMD Dust Control Handbook for additional requirements on larger projects.
2. The PM10 plan will need to be prepared per the instructions in the AQMD Dust Control Handbook. Form templates for preparing the plan are available from the City or the AQMD.
3. Any individual responsible for preparing a PM10 plan must possess a certificate of attendance for the Coachella Valley Fugitive Dust Control Class.
4. Any person performing any site grading, whether contractor or owner, must possess a certificate of attendance for the Coachella Valley Fugitive Dust Control Class or designate an individual who has a certificate of attendance to represent them by completing a Owner Designee form.

If you have not yet attended the class you will need to contact the AQMD Tuesday through Friday between the hours of 7:00 AM and 5:30 PM. To register, contact:

Sharon Fujimoto  
South Coast Air Quality Management District  
(866) 861-3878  
[dustcontrol@aqmd.gov](mailto:dustcontrol@aqmd.gov)

Classes are held monthly in the CVAG building in the Palm Desert Civic Center.\*  
Contact the AQMD for the exact dates and times of the classes.  
There is no fee to take the class.

*\*If you have a group of at least 15 persons desiring to become certified, the AQMD will conduct the class at your site free of charge.*

**PM10 PLAN**

**(FORM I)**

**PAGE #1**

## Instructions For Preparing a PM10 Plan Projects Less Than 10 Acres In Size

1. If you have not yet attended the Coachella Valley Fugitive Dust Control Class and received a certificate of completion, and you are not designating a certified individual to act in your behalf, contact the AQMD to register for the class. Contact Sharon Fujimoto at (866) 861-3878. The class is offered monthly free of charge.
2. Fill out the 4 pages of the INDIO Fugitive Dust Control Plan Application Form - (FORM A). When completing Form "A" follow instructions to complete a vicinity map and site exhibit.
3. If you are designating a certified individual to act on your behalf, complete the Ownership Designee Form - (FORM OD).
4. Fill out the 5 pages of the INDIO Fugitive Dust Control Plan for Projects less than 10 Acres – (FORM DCP). In each source category place an 'X' next to the best available control measure(s) you intend to use. If a source category is not applicable to your project, write "N/A" over the box.
5. Submit the PM10 Plan Packet to the department of Public Works with your grading plan submittal.
6. At the time of grading permit issuance, obtain a PM10 sign per the attached drawing, and post at the site entrance prior to starting any grading operations. The sign may be removed only after all grading activities have ceased, any exposed areas have been stabilized, and the grading has received a final inspection signoff.

**CITY OF INDIO ENGINEERING DIVISION  
GRADING PERMIT AND PM10 REQUIREMENTS**

► **When Is a Grading Permit Needed?**

No person shall conduct any grading, excavation, earth moving, filling, clearing, brushing or grubbing on natural or existing grade, or perform work that is preparatory to grading, without first having obtained a valid grading permit.

Grading permits expire 180 days after the date of issuance. This includes 90 days within which work must begin and then work must be completed within the following 90 days.

► **Types of Grading Permits**

Mass Grading Permit - Issued for clearing and grubbing, and spreading earth material.

Rough Grading Permit - Issued for general grading work, prior to precise grading of a site.

Stockpile Grading Permit - Issued for the temporary stockpile of materials with the understanding that the materials shall be removed from the stockpile site, or compacted and worked under a rough grading permit within six months. The stockpile material must be graded and placed such that unreasonable erosion will not occur and the material does not interfere in any way with existing natural or improved drainage courses or channels.

Precise (Finish) Grading Permit - Issued for the construction of concrete or asphalt paving, or any other surfacing material in excess of 6,000 square feet, on natural or existing grade for the purpose of a private road or travel way, or in excess of 1,000 square feet for any commercial, industrial, multi-residential parking lot.

► **PM10 Requirements**

All projects ***disturbing*** more than 5,000 sq. ft. of earth must complete a PM10 plan, consisting of a 24"x36" plan and an 8 ½"x11" handout.

The City of Indio requires a Cashiers Check and a cash Certificate of Deposit, in an amount equal to at least two thousand dollars (\$2,000.00) per acre or portion thereof. Such funds shall be in an amount sufficient to completely stabilize all disturbed areas in the event that the Operator fails to adequately control dust, or abandons the site in lieu of mitigating fugitive dust problems; and shall be easily accessible to the City in order to initiate stabilization measures without a significant delay. Up to twenty thousand dollars (\$20,000.00) shall be in a cashiers check made payable to the City of Indio, any amount above that shall be in the form of a Certificate of Deposit.

***Disturbed Surface Area*** - means a portion of the earth's surface which has been physically moved, uncovered, destabilized, or otherwise modified from its undisturbed natural soil condition, thereby increasing the potential for emission of fugitive dust. This definition excludes those areas which have:

- (A) been restored to a natural state, such that the vegetative ground cover and soil characteristics are similar to adjacent or nearby natural conditions;
- (B) been paved or otherwise covered by a permanent structure; or
- (C) sustained a vegetative ground cover of at least 70 percent of the native cover for a particular area for at least 30 days.

Further information can be found in section 162 of the City of Indio Code of Ordinances and AQMD Booklet

**Justification**

*If you believe that none of the control measures for a given source category are technically feasible or if they would conflict with other regulations, please describe the justification in the space provided. Please be specific. If necessary, attach additional information.*

AQMD DUST CLASS CERTIFICATE #	

### 7. Site Mapping

Provide a map showing the vicinity of the project clearly identifying the closest major cross streets or other landmarks and the project location. Label this map “Vicinity Map”. Required map size is 8 ½” by 11”.

Provide an 8 ½” by 11” or larger **Site Exhibit** for the property(s) on which the project will be occurring. Identify the affected parcels. Identify location of site entrances, internal unpaved haul routes, wind fencing, areas to be chemically stabilized and other proposed and required dust control mitigations. Projects that are only installing or constructing linear features such as roads, pipelines or other utilities that border or cross more than one Assessor’s parcel do not require a Site Exhibit, but must provide a detailed vicinity map adequately depicting the entire project area. If the project is divided into construction phases (separate physical project areas), provide an exhibit clearly identifying the phases.

### 8. Attach a Fugitive Dust Control Plan

- ✓ Projects with less than 10 acres of disturbed surfaces must complete and attach a Fugitive Dust Control Plan (Form DCP) or equivalent.
- ✓ Projects with 10 acres or more of disturbed surfaces must complete and attach a Site-Specific Fugitive Dust Control Plan. Guidance for preparation of a Site-Specific Fugitive Dust Control Plan is available upon request.

**9. Project notifications**

For projects with 10 acres or more of disturbed surfaces, the dust control ordinance requires notification to the local permitting authority and to the AQMD prior to project initiation and at project completion. (Refer to Chapter 4 of the Coachella Valley Fugitive Dust Control Handbook for specific requirements and forms).

**10. Project Signage**

Construction signage must be installed on-site prior to construction. Guidelines for construction signage are found attached to this packet.

**11. Owner Agreement**

**A signature on this application constitutes an agreement by the owner to be the person with authority to enforce compliance by all contractors and subcontractors of the Dust Control Ordinance, Fugitive Dust Control Plan conditions, and any supplements identified by the permitting authority. Once approved, this application is incorporated by reference and becomes a part of the approved site grading plan.**

### OWNER STATEMENT

I hereby authorize the person listed as my designee to act on my behalf in all matters regarding the issuance and requirements of the Fugitive Dust Control Plan for construction activities. The designee is responsible for project duration. The designee has successfully completed the AQMD Coachella Valley Fugitive Dust Control Class. Furthermore, the designee is responsible for ensuring the contractor(s), subcontractor(s), and all other persons associated with the project are in compliance with the approved Fugitive Dust Control Plan, dust control ordinance requirements, and AQMD regulations.

## INSTRUCTIONS

### FUGITIVE DUST CONTROL PLAN PREPARATION GUIDANCE FOR SMALLER CONSTRUCTION PROJECTS (LESS THAN 10 ACRES)

The following instructions have been prepared to assist project operators in preparing a Fugitive Dust Control Plan for construction activities with less than 10 acres of disturbed surfaces. Submitting a complete Fugitive Dust Control Plan is essential in expediting the process, so please read and follow the instructions carefully.

#### Fugitive Dust Control Plan Guidance

Use the attached pages (Form DCP) to designate the dust control actions to be implemented on-site. Separate the actions to be implemented during the various project phases (e.g., clearing/grubbing and mass grading, finish grading, and site construction, etc.). If applicable, describe the additional control actions to be implemented on-site.

Please remember the following when preparing a Fugitive Dust Control Plan:

- ✓ A complete copy of the Fugitive Dust Control Plan and all maps must be on-site prior to beginning construction activity and must be retained on-site at all times during project construction.
- ✓ Construction signage must be installed on-site prior to construction. Guidelines for construction signage are found in this packet.
- ✓ Dust control is required 24 hours a day, 7 days a week for the duration of the project regardless of wind conditions or construction project status.
- ✓ Daily recordkeeping of dust control actions is required to be compiled and retained during project duration and for three years after project completion.
- ✓ Grading plans must include a statement that incorporates the approved fugitive dust control plan into the approved grading plan.

#### Example

Backfilling	Stabilize backfill material: <input checked="" type="checkbox"/> 01-1 when not actively handling; <input checked="" type="checkbox"/> 01-2 during handling; <input type="checkbox"/> 01-3 at completion of activity. Source Category	Control Measure	Guidance
Turf overseeding	18-1 Apply sufficient water immediately prior to conducting turf vacuuming activities to meet opacity and plume length standards; and 18-2 Cover haul vehicles prior to exiting the site.	✓ Haul waste material immediately off-site
Unpaved roads/parking lots	19-1 Stabilize soils to meet the applicable performance standards; and 19-2 Limit vehicular travel to established unpaved roads (haul routes) and unpaved parking lots.	✓ Restricting vehicular access to established unpaved travel paths and parking lots can reduce stabilization requirements
Weather monitoring/work practices	20-1 Monitor current weather conditions and weather predictions from the AQMD's toll free wind forecast system (800) CUT-SMOG [Press 1, then Press 5] and / or the National Weather Service; and 20-2 Cease all construction activities if fugitive dust emissions exceed 20 percent opacity or if 100 foot visible plume restriction cannot be met. Control measures (e.g., water trucks/pulls) must continue to operate unless operation of such equipment cannot reduce fugitive dust emissions or if visibility is limited to such an extent that it is hazardous to continue operating such equipment.	✓ Documentation of weather (e.g., wind) conditions can facilitate compliance determinations when using an affirmable defense to dust control ordinance and Fugitive Dust Control Plan requirements

### SUMMARY OF DUST CONTROL ORDINANCE REQUIREMENTS

The Coachella Valley dust control ordinances require:

- ✓ at least one of the Coachella Valley Best Available Control Measures (CV BACM) is required to be implemented for each fugitive dust source category.
- ✓ CV BACM must be implemented such that the applicable performance standards (e.g., visible emissions not to exceed 100 feet or 20 percent opacity, or cross any property line, etc.) are met.

A description of the performance standards and applicable test methods is included in Chapter 8 of the Coachella Valley Fugitive Dust Control Handbook.

*I hereby certify that I have read and understand the foregoing requirements.*

### (FORM BOND)

### PAGE #1

### Surety Bond or Certificate of Deposit (Form BOND)

The City Council of the City of INDIO shall require a bond, a cash Certificate of Deposit, or an equivalent form approved by the City, in an amount equal to at least two thousand dollars (\$2,000.00) per acre or portion thereof. Such funds shall be in an amount sufficient to completely stabilize all disturbed areas in the event that the Operator fails to adequately control dust, or abandons the site in lieu of mitigating fugitive dust problems; and shall be easily accessible to the City in order to initiate stabilization measures without a significant delay.

FORM OF PAYMENT	PARCEL SIZE IN ACRES	\$2,000.00/ACRE	AMOUNT OF BOND
Cash Deposit		\$2,000.00	
Certificate of Deposit		\$2,000.00	
Letter of Credit		\$2,000.00	
Other (specify)		\$2,000.00	

Parcel Size x \$2,000.00 Per Acre = Amount of Bond
